STANDARD FEATURES

DESIGN

- True's refrigerated back bar coolers are designed with enduring quality and value. Our commitment to using the highest quality materials and oversized refrigeration assures colder product temperatures and years of trouble free service.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydrocarbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- High capacity, factory balanced refrigeration system that maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C) for the best in food preservation.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Condensing unit accessed from behind front grill, slides out for easy cleaning and maintenance.

CABINET CONSTRUCTION

- Exterior - stainless steel front and sides. Matching aluminum back. All stainless steel counter top.

- Interior - Stainless steel floor with ½" (13 mm) reinforced lip and heavy gauge galvanized steel walls.
- Door threshold protector prevents damage to cabinet from routine loading of product.
- Insulation - entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.

DOORS

- "Low-E", double pane thermal insulated glass door assemblies with extruded aluminum frames. The latest in energy efficient technology.
- Each door fitted with 12" (305 mm) long extruded aluminum handle.
- Positive seal doors.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.
- Door locks standard.

SHELVING

- Four (4) adjustable, heavy duty, black PVC coated wire shelves 17 ¾"L x 16 ¼"D (442 mm x 413 mm). Four (4) chrome plated shelf clips included per shelf.
- Aluminum shelf support pilasters. Shelves are adjustable on ½" (13 mm) increments.

LIGHTING

- LED interior lighting provides more even lighting throughout the cabinet. Safety shielded.

MODEL FEATURES

- Evaporator is epoxy coated to eliminate the potential of corrosion.
- Designed to accommodate a variety of beer kegs.
- NSF/ANSI Standard 7 compliant for the storage and/or display of packaged or bottled product.

ELECTRICAL

STANDARD FEATURES

DESIGN

- True's refrigerated back bar coolers are designed with enduring quality and value. Our commitment to using the highest quality materials and oversized refrigeration assures colder product temperatures and years of trouble free service.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydrocarbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- High capacity, factory balanced refrigeration system that maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C) for the best in food preservation.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Condensing unit accessed from behind front grill, slides out for easy cleaning and maintenance.

CABINET CONSTRUCTION

- Exterior - stainless steel front and sides. Matching aluminum back. Galvanized steel top designed to slide under existing cabinetry.

- Interior - Stainless steel floor with ½" (13 mm) reinforced lip and heavy gauge galvanized steel walls.
- Door threshold protector prevents damage to cabinet from routine loading of product.
- Insulation - entire cabinet structure and solid doors are foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.

DOORS

- Stainless steel exterior with heavy gauge galvanized steel liner.
- Each door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to ensure permanent attachment.
- Positive seal doors.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.
- Door locks standard.

SHELVING

- Four (4) adjustable, heavy duty, black PVC coated wire shelves 23 ¾"L x 18"D (604 mm x 458 mm). Four (4) chrome plated shelf clips included per shelf.
- Aluminum shelf support pilasters. Shelves are adjustable on ½" (13 mm) increments.

LIGHTING

- LED interior lighting provides more even lighting throughout the cabinet. Safety shielded.

MODEL FEATURES

- Evaporator is epoxy coated to eliminate the potential of corrosion.
- Designed to accommodate a variety of beer kegs. Depending on tapping kit used, ½ barrels may not fit.
- NSF/ANSI Standard 7 compliant for the storage and/or display of packaged or bottled product.

ELECTRICAL

- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase, 15 amp dedicated outlet. Cord and plug set included.

Underbar Refrigeration:

Glass Swing Door Galvanized Top 24" Back Bar Cooler
with LED Lighting & Hydrocarbon Refrigerant

STANDARD FEATURES

DESIGN

- True's refrigerated back bar coolers are designed with enduring quality and value. Our commitment to using the highest quality materials and oversized refrigeration assures colder product temperatures and years of trouble free service.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydrocarbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- High capacity, factory balanced refrigeration system that maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C) for the best in food preservation.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Condensing unit accessed from behind front grill, slides out for easy cleaning and maintenance.

CABINET CONSTRUCTION

- Exterior - Black, powder coated cold-rolled steel with stainless steel countertop. Galvanized steel top designed to slide under existing cabinetry.

- Interior - Stainless steel floor with ½" (13 mm) reinforced lip and heavy gauge galvanized steel walls.
- Door threshold protector prevents damage to cabinet from routine loading of product.
- Insulation - entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.

DOORS

- "Low-E", double pane thermal insulated glass door assemblies with extruded aluminum frames. The latest in energy efficient technology.
- Each door fitted with 12" (305 mm) long handle.
- Positive seal doors.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.
- Door locks standard.

SHELVING

- Six (6) adjustable, heavy duty, black PVC coated wire shelves. Two (2) right and two (2) left shelf dimensions are 19"L x 16 ¼"D (483 mm x 413 mm). Two (2) center door shelf dimensions are 19 ⅝"L x 16 ¼"D (499 mm x 413 mm). Four (4) chrome plated shelf clips included per shelf.
- Aluminum shelf support pilasters. Shelves are adjustable on ½" (13 mm) increments.

LIGHTING

- LED interior lighting provides more even lighting throughout the cabinet. Safety shielded.

MODEL FEATURES

- Evaporator is epoxy coated to eliminate the potential of corrosion.

Underbar Refrigeration:
Solid Swing Door Stainless Steel Pass-Thru Back Bar Cooler

STANDARD FEATURES

DESIGN

- True's refrigerated back bar coolers are designed with enduring quality and value. Our commitment to using the highest quality materials and oversized refrigeration assures colder product temperatures and years of trouble free service.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly (CFC free) 134A refrigerant.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser; maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C).
- Sealed, cast iron, self-lubricating evaporator fan motor(s) and larger fan blades give True back bar coolers a more efficient low velocity, high volume airflow design. This unique design ensures faster temperature pull down of warm product, colder holding temperatures and faster recovery in high use situations.
- Condensing unit accessed from behind front grill, slides out for easy cleaning and maintenance.

CABINET CONSTRUCTION

- Exterior - stainless steel front, back, sides and countertop.

- Interior - Stainless steel floor with ½" (13 mm) reinforced lip and heavy gauge galvanized steel walls.
- Door threshold protector prevents damage to cabinet from routine loading of product.
- Insulation - entire cabinet structure and solid doors are foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.

DOORS

- Stainless steel exterior with heavy gauge galvanized steel liner.
- Each door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to ensure permanent attachment.
- Positive seal doors.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.
- Door locks standard.

SHELVING

- Six (6) adjustable, heavy duty, black PVC coated wire shelves. Two (2) right and two (2) left shelf dimensions are 23 ½"L x 21 ¼"D (597 mm x 540 mm). Two (2) center shelf dimensions are 28 1/4"L x 21 ¼"D (718 mm x 540 mm). Four (4) chrome plated shelf clips included per shelf.
